

Title:

Research Associate - Biology
Part time

Mission and Responsibilities:

We are seeking a highly motivated Research Associate to help with toxicity, efficacy and pharmacokinetic studies in rodent models.

The successful candidate will work closely with and report to a Sr. Research Scientist.

Required experience and skills:

- Strong experience with animal handling, dosing (IV, SC, IP), sacrifice, and organ harvesting.
- Experience with various *in vitro* assays including ELISA and cell based assays.
- Experience with mathematical analysis of data from various ELISA mode and deep understanding weight vs. molar concentrations vs. absolute amount of substance.
- Experience with *in vitro* assay development and tissue culture.
- Working knowledge of immunology and biology of diabetes is a plus.
- Excellent communication and organizational skills, ability to focus and prioritize multiple projects, and adaptability required. Must be available for occasional work on weekends and evenings.
- Taking complete and accurate daily notes

Qualifications:

- Bachelor's degree in biology, biotechnology, biochemistry or similar
- At least five years of experience working in a research lab
